detector pipeline
Annotated frames
42 raw labels, 66 tows
Annotation dataset
14 classes,
splits by tow
Object detector
trained, compared,
calibrated
Detections on every
transect frame,
fixed structure removed
Camera series
counts and depth
per 10 s
future work
Echosounder record
six channels
Acoustic
preprocessing
Alignment with
trawl position
and time
Acoustic species
models supervised
by the detections
